

PRODUCT DESTRUCTION

PRODUCT DESTRUCTION

Vexor Technology ensures total product destruction for disposal or waste-to-energy incineration, providing witness to destruction if needed. This service eliminates both long term liability for the generator and re-entry of the product to the marketplace.

Our goal is to provide options for your waste that meet your needs from all perspectives: waste reduction, cost minimization, corporate liability and regulatory mandates. Our state-of-the-art facility provides best available technology and regulatory compliant disposal choices.

We offer many alternative disposal technologies:

- Liquid products for waste-to-energy, and wastewater treatment
- Paper packages to paper recycling or Vexor Engineered Fuel®
- Plastic containers to plastic recycling or Vexor Engineered Fuel®
- Secure product destruction through shredding
- Complete computerized bar code tracking
- Video capture of processing
- Ingredient capture for reuse

BENEFITS

Vexor Technology's state-of-the-art facilities provide best available technology (BAT) and regulatory compliant disposition choices through a single source.

Our waste disposal options meet your need for all perspectives:

- Waste reduction
- Cost minimization
- Corporate liability
- Regulatory mandates
